Education

B.Tech in Computer Science Engineering

Indian Institute of Information Technology, Nagpur

2023 – 2027

Experience

Backend Developer Intern | ZidyanTech (IT Services Agency)

Remote

Node.js, Express.js, PostgreSQL, JWT, REST APIs

- Developed a **role based access control (RBAC) system** using Express.js and JWT, supporting **4 distinct user roles** and enforcing permission checks across **20+ protected API endpoints**.
- Designed and implemented a **complete backend architecture** handling authentication, authorization, and business logic.
- Structured PostgreSQL schemas for users, roles, and permissions, reducing authorization related query complexity by **25 percent**.
- Collaborated with frontend developers to finalize API contracts, reducing integration bugs and rework cycles by **40 percent** during deployment.

Projects

ProfileIQ | React, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini API

GitHub Live

- Built a MERN stack platform to evaluate non academic student profiles across 4 dimensions for college admissions.
- Implemented **role based authentication** using **Node.js and Express.js**, enforcing strict access control.
- Integrated **Gemini API** to generate structured evaluation reports in under 3 seconds per request.
- Developed dashboards using **Recharts** to visualize score progression across evaluations.

BondUForward | React, Node.js, PostgreSQL, Socket.io, Docker

GitHub Live

- Built a real time matchmaking system pairing students based on problem solving level and learning goals.
- Designed a **weighted scoring algorithm** using core data structures to rank user compatibility.
- Implemented **Socket.io based real time updates**, reducing repeated rematching attempts by 25 percent.

EmergencyNet | Node.js, libp2p, Express.js, GossipSub

GitHub

- Built an offline peer to peer communication backend for local device to device messaging without internet access.
- Implemented **mDNS based peer discovery** using **libp2p**, enabling node discovery within 2 to 5 seconds.
- Used **GossipSub pub sub** to broadcast messages across multiple nodes during testing.

Skills

- **Languages:** C++, JavaScript, TypeScript, Python
- **Frameworks/Libraries:** React, Tailwind CSS, Express.js, FastAPI, libp2p
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, GitHub, Linux, Docker, Prisma, Vercel, Render

Achievements and Certificate

- Solved 100 plus problems on competitive programming platforms.
- Completed Full Stack Web Development Bootcamp by Angela Yu.
- Contributed to open source projects at OWASP Nest.

Coursework

- Data Structures and Algorithms, Computer Networks, Operating System, Object Oriented Programming
