

NIKITA YADAV

Aspiring Software Engineer | B.Tech, Computer Science Engineering

Indore, Madhya Pradesh | nikitayadav88899@gmail.com | 8889942579 | [linkedin.com/in/nikita-yadav-b00a58236](https://www.linkedin.com/in/nikita-yadav-b00a58236)

CAREER OBJECTIVE

Computer Science graduate with a solid foundation in Python and software fundamentals, built through end-to-end projects spanning automation scripting, web apps, and machine learning, plus a data-analysis internship where I learned to take a task from ambiguity to a working, feedback-tested result. Curious by nature — I like taking things apart to understand how they work, then building something with that understanding. Looking for a software engineering apprenticeship where I can learn from experienced mentors, contribute real code, and grow alongside a wider team.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Frameworks & Libraries: Django, Scikit-learn, NumPy, Pandas, NLTK
- Tools & Version Control: Git/GitHub, Linux (Ubuntu), shell scripting, cron
- Cloud & Core CS: AWS (EC2, S3, IAM, VPC, CloudWatch), DBMS, Data Structures, Machine Learning

INTERNSHIP EXPERIENCE

Data Analyst Intern — Clepsydra Technologies Private Limited

2026

- Processed and analyzed real-world datasets using Python, performing EDA and data visualization to extract meaningful business insights with Pandas, NumPy, Matplotlib, and Seaborn.
- Built and validated data-driven models using Scikit-learn under minimal supervision, learning to work methodically, test assumptions, and double-check results before sharing them.
- Took ownership of assigned analysis tasks end-to-end, communicated findings clearly to stakeholders, and incorporated feedback iteratively — building habits of clean, well-documented, collaborative work.

ACADEMIC PROJECTS

Resume Screener — Python, Pandas, NumPy, NLTK, Scikit-learn

- Built a machine learning application that extracts text from resume PDFs and classifies candidates into predefined job categories using K-Nearest Neighbors (KNN), automating initial screening and reducing manual recruiter effort.

WhatsApp Chat Analyzer — Python, NumPy, Pandas, Matplotlib, Seaborn, Streamlit

- Developed an end-to-end Python/Streamlit tool that parses chat logs and generates word-frequency, timeline, and user-activity visualizations, delivering actionable insights from unstructured text data.

Automated File Backup to AWS S3 — Python, boto3, AWS S3, Linux, Cron

- Wrote a Python script using boto3 to automatically upload local files to an S3 bucket, with logging to track the success or failure of each run.
- Scheduled the script as a daily cron job on Linux to run backups without manual intervention, and published it as an open, documented repository on GitHub with a setup README for others to build on.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

2021 – 2025

B.Tech, Computer Science Engineering — CGPA: 7.65

Ana Convent School, Indore

2020 – 2021

Higher Secondary Certificate (10+2) — 68%

Saraswati Shishu Mandir, Indore

2018 – 2019

Secondary School Certificate — 68%

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional — Oracle (valid through Oct 2027)
- Data Science Professional Certification — Oracle
- Cloud Computing — NPTEL
- Machine Learning with Flask — Coding Thinker
