

NIKITA YADAV

B.Tech - Computer Science Engineering

Indore, Madhya Pradesh | nikitayadav88899@gmail.com | 8889942579 | [linkedin.com/in/nikita-yadav-b00a58236](https://www.linkedin.com/in/nikita-yadav-b00a58236)

CAREER OBJECTIVE

Computer Science graduate with a strong foundation in programming and DBMS. Experienced in Python, SQL, and machine learning through academic projects and an internship focused on data analysis. Quick learner, collaborative team player, and eager to build a career in software engineering while contributing to impactful, real-world projects.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Core CS Concepts: DBMS, Machine Learning
- Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, NLTK, Scikit-learn, Django
- Cloud & Tools: AWS (EC2, S3, IAM, VPC, CloudWatch), Linux, Git/GitHub

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore <i>B.Tech, Computer Science Engineering — CGPA: 7.65</i>	2021 – 2025
Ana Convent School, Indore <i>Higher Secondary Certificate (10+2) — 68%</i>	2020 – 2021
Saraswati Shishu Mandir, Indore <i>Secondary School Certificate — 68%</i>	2018 – 2019

INTERNSHIP EXPERIENCE

Data Analyst Intern — Clepsydra Technologies Private Limited	2026
• Processed and analyzed real-world datasets using Python, performing EDA and data visualization to extract meaningful business insights with Pandas, NumPy, Matplotlib, and Seaborn. • Built and optimized machine learning models using Scikit-learn to support predictive analysis and data-driven decision-making, working to direction with reducing supervision to deliver accurate, reliable results.	

ACADEMIC PROJECTS

Spam Classifier	<i>Python, Pandas, NumPy, NLTK, ML Models</i>
• Designed and implemented a spam-classification system using Decision Tree, Random Forest, and Naive Bayes models, optimizing email filtering accuracy and communication efficiency.	
Resume Screener	<i>Python, Pandas, NumPy, NLTK, Scikit-learn</i>
• Built a machine learning application that extracts text from resume PDFs and classifies candidates into predefined job categories using K-Nearest Neighbors (KNN), automating initial screening and reducing manual recruiter effort.	
WhatsApp Chat Analyzer	<i>Python, NumPy, Pandas, Matplotlib, Seaborn, Streamlit</i>
• Developed an end-to-end Python/Streamlit tool that parses chat logs and generates word-frequency, timeline, and user-activity visualizations, delivering actionable insights from unstructured text data.	

CERTIFICATIONS

- Data Science Professional Certification — Oracle
- Cloud Computing — NPTEL
- Machine Learning with Flask — Coding Thinker
