NIKITA YADAV

B.Tech - Computer Science Engineering

Indore, Madhya Pradesh | nikitayadav88899@gmail.com | 8889942579 | linkedin.com/in/nikita-yadav-b00a58236

CAREER OBJECTIVE

Computer Science graduate with a strong foundation in programming and DBMS. Experienced in Python, SQL, and machine learning through academic projects and an internship focused on data analysis. Quick learner, collaborative team player, and eager to build a career in software engineering while contributing to impactful, real-world projects.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Core CS Concepts:** DBMS, Machine Learning
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, NLTK, Scikit-learn, Django
- **Cloud & Tools:** AWS (EC2, S3, IAM, VPC, CloudWatch), Linux, Git/GitHub

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore 2021 – 2025
B.Tech, Computer Science Engineering — CGPA: 7.65

Ana Convent School, Indore 2020 – 2021
Higher Secondary Certificate (10+2) — 68%

Saraswati Shishu Mandir, Indore 2018 – 2019
Secondary School Certificate — 68%

INTERNSHIP EXPERIENCE

Data Analyst Intern — Clepsydra Technologies Private Limited 2026

- Processed and analyzed real-world datasets using Python, performing EDA and data visualization to extract meaningful business insights with Pandas, NumPy, Matplotlib, and Seaborn.
- Built and optimized machine learning models using Scikit-learn to support predictive analysis and data-driven decision-making, working under minimal supervision to deliver accurate, reliable results.

ACADEMIC PROJECTS

Resume Screener *Python, Pandas, NumPy, NLTK, Scikit-learn*

- Built a machine learning application that extracts text from resume PDFs and classifies candidates into predefined job categories using K-Nearest Neighbors (KNN), automating initial screening and reducing manual recruiter effort.

WhatsApp Chat Analyzer *Python, NumPy, Pandas, Matplotlib, Seaborn, Streamlit*

- Developed an end-to-end Python/Streamlit tool that parses chat logs and generates word-frequency, timeline, and user-activity visualizations, delivering actionable insights from unstructured text data.

Automated File Backup to AWS S3 *Python, boto3, AWS S3, Linux, Cron*

- Wrote a Python script using boto3 to automatically upload local files to an S3 bucket, with logging to track the success or failure of each run.
- Scheduled the script as a daily cron job on Linux to run backups without manual intervention, and published it in a public GitHub repository with a setup README.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional — Oracle (valid through Oct 2027)
- Data Science Professional Certification — Oracle
- Cloud Computing — NPTEL
- Machine Learning with Flask — Coding Thinker
